Mobile Cinema for the Community

# Introduction..

We are young people that use the service of Gisda.

Gisda is a charity that works with young people between the ages of 16-25 that are homeless or at the risk of becoming homeless.

My name is Sophie Dymore and I am the team leader and we all as a group use the service of gisda.

We have come up with the idea of doing a Mobile Cinema for the public of Caernarfon and the surrounding area which will be called 'Cinematic'.

We have been recently funded by the Princes Trust and in the process of buying the equipment for our project.

We think that this a good idea because there isn't a cinema around the Caernarfon area. The closest cinema is in Llandudno Junction which you need public transport to get there or even if you drive you use your own petrol, some people don't have the money to travel to Llandudno Junction. With our Mobile Cinema, we are offering a free service to see how many people would use our service. With our cinema we will be showing films for all age groups and also we are thinking of doing it for special occasions, for example:

- Christmas
- Halloween
- Valentines day
- Saint David's Day
- Easter

In the future we would also like to show special events that are screened on TV such as: Six Nations Rugby and other sporting events.

# Our Vision.

To begin with, Cinematic will be based in Caernarfon and the surrounding area. We could put the cinema in our local car park, football field and maybe on the square. We would contact the relevant department in the local council to organise a local meeting to discuss the possibility of working together. If everything goes ok with this we would like to take it further , possibly to different venues and different locations, by doing this it will bring the whole community together.

# Our Needs and Aims.

We understand that we need a licence to show films and know that these licences cost a lot of money. In order to generate money to buy the licence, we will rent the screen and projector to local organisations such as youth clubs for a small fee and that money will then be used to get the appropriate licence. We have emailed licensing companies to get a list of prices for film showings as prices vary depending on how many people we will be showing it to.

# Opening Night.

We hope to hold our first event during the run up towards Christmas. We recognise that the council run a Christmas fair with the big screen showing young pupils at schools singing Christmas carols, in the past it has been an annual event, although due to council cuts they will not be in a position to do that this year and we hope to come in and provide the service and the council could use our equipment for the screening of the schools performance. The council would decide where they want to screen this event.

By working with the council we would learn from their expertise in organising events and gain free publicity for our project.

# Our Final Summary.

It's a cinema for the whole community for young and old alike. We could hire our cinema out for a fee and that money could be put back into cinematic. As we have been funded by the Princes Trust they have also said that they would give us a reference. We hope that this has given you an insight into our plans and hopes for our community project.
